

8th February, 2026

SECCO Disbursement Report as at 7th February, 2026

This report presents an analysis of the performance of SECCOs during the 2025/2026 groundnut trade season, using verified delivery and financing data up to 7th February 2026. It highlights delivery progress, which explains the rationale for withholding additional float from SECCOs that have not yet reached the minimum delivery threshold of **89%**. As at 7th February 2026, a total of **D351,272,400** had been disbursed to contracted private traders for the purchase of 8,782 MT of clean (screened) farmers' stock, in addition to payments of **D1,320,196,093** made to CPMS, bringing the total value of groundnut purchases to **D1,671,468,493**. The report also confirms NFSPMC's continuous support for groundnut intake from SECCOs and its sustained commitment to maintaining efficient and effective logistics operations across the value chain.
